

I want my Satellite Radio!!! XM Radio is one of the greatest innovations and really provides an excellent service. The quality is very good and the diversity of offerings is unparalleled. I listen every day, including the Detroit Traffic and weather service. Using the instantaneous Traffic report for my 60 mile trip home from work, allows me to make the best route choices, saving fuel and reducing emissions. The value of this service for the money that I spend is outstanding. I would be very upset if this service is either eliminated or limited.
